

Family Support for Scheduling Treatment

Substance Abuse is a serious disorder, and it will not go away on its own. We recommend that parents and teens think of it as they might a cancer or diabetes diagnosis and make the adjustments to their lives and schedules in the same way they would for those other serious problems. Scheduling treatment can be a challenge, for any type of illness, but Adolescent Substance Abuse Program strive to make it easier.

In order to make scheduling treatment easier, ASAP will work with you in the following ways:

WE OFFER TWO DIFFERENT [INTENSIVE OUTPATIENT PROGRAM](#) TRACKS:

- TRIP (Total Recovery in Progress) Weekday – Monday, Tuesday, and Thursday from 3:30 PM-6:30 PM: Parents meet on Tuesday and Thursday from 5:30 PM-6:30 PM
- TRIP Weekend – Friday from 3:30 PM-6:30 PM and Saturday and Sunday from 9 AM-noon: Parents meet on Saturday and Sunday from 11 AM-noon

Parents are a vital part of your child's recovery and the TRIP program. Being in parent and family group gives an opportunity to get information and connect with other parents. The ASAP professionals are dedicated to the highest quality care. This includes answering your questions

and providing parents with progress updates.

ASAP WILL COMPLETE FMLA (FAMILY MEDICAL LEAVE ACT) PAPERWORK AT NO CHARGE.

This enables a parent to drive your child to and from treatment and attend sessions without a penalty from their employer.

[Parent participation](#) can mean the difference between a teen who successfully graduates and those who relapse or never finish treatment. While recovery is never a guarantee as a result of treatment, we see much greater success when parents take an active role in their child's treatment.
