ASAP is Cincinnati's premiere outpatient treatment center for teenagers and their families struggling with substance use.

You'll Find Best Practices at ASAP

Not all Substance Use Disorder (SUD) treatment programs are created equally. ASAP focuses solely on teens and their families. We also engage in all 9 Best Practices for SUD Treatment.

Incorporating Best Practices

Operating with best practices allows ASAP to be confident in the <u>treatment</u> we provide. We've <u>designed</u> our facility around teens and their families. Utilizing all 9 best practices for SUD treatment has earned ASAP certifications from CARF at each of our surveys.

From our <u>intake</u> process through our <u>Continuing Care</u> program, ASAP is a model for effective, caring treatment. Our clients and their parents give feedback during and after treatment to ensure that we are meeting our goals.

ASAP encourages clients to continue in established relationships with individual clinicians. We want to add SUD treatment when needed, rather than replacing what is helping. When clinicians recognize that clients would benefit from more intensive treatment, we can work with them. We offer families a Release of Information in order to communicate with our patient's clinicians.
