

Fran Schwartz, CDCA

Fran Schwartz, CDCA

CLINICAL STAFF

As a mother of seven children, Fran brings her unique life experience to the ASAP clinical team. She is a parent walking the journey of addiction with one of her own children. After participating in and gaining so much knowledge and help from the ASAP programs, she decided to obtain her Chemical Dependency Counseling Assistant license from the State of Ohio to help other families as they walk this difficult journey. Her previous experience as an elementary school teacher and a high school youth minister also contribute to her knowledge of young people and connecting with them. Due to the lived experience of having an addict in the family, she is keenly aware that substance use and mental health issues affect the entire family! For this reason, she believes that the whole family needs support and that is what we specialize in here at ASAP, helping the family!

To contact Ms. Schwartz, please feel free to email her at franschwartz@asapcincinnati.com.
